Dr. agr. Wahyudi David

Academic Degree

2008-2011 Dr.agr. Organic Food Quality and Food Culture. Universitaet Kassel, Germany

2006-2008 M.Sc. Intl. Organic Agriculture. Universitaet Kassel, Germany

2001-2005 B.Sc. in Agricultural Technology. Universitas Andalas, Indonesia.

Working Institution

2013- present Assistant Professor in Food Sci and Tech Universitas Bakrie

2011-2013 Adjunct lecturer in Food Sci and Tech Universitas Andalas

2008-2011 Junior Scientist in Organic Food Quality and Food Culture, Universitaet Kassel

ISOFAR membership

ISOFAR membership since 2008 to present

Experience in organic research

- 1. Organic Coffee (2018-present)- contributing for identification of single origin organic coffee
- 2. Organic rice (2015-2020)- contributing for organic brown rice perception
- 3. Indonesian Organic Rice Standard (2014-2015) -contribution for organic rice standard
- 4. Organic Food System (2016-present)- contribution for system establishing in the case of Indonesia
- 5. Food Culture (2011-2019)- contributing in identification of typology of food culture in Indonesia

Motivation letter

More than 12 years I was involving in the organic research particularly in the processing and sensory evaluation. I serves as associate editor of Journal Organic Agriculture (section food processing) (<u>https://www.springer.com/journal/13165/editors</u>) as well as Managing Editor of Asia Pacific Journal of Sustainable Agriculture Food and Energy. In 2013, together with other Universities colleague in the region Southeast Asia, I am initiated Sustainable Agriculture Food and Energy (SAFE) Network that consist of 10 countries and 34 Universities in the Asia Pacific region.

I have been publishing more than 50 scientific papers. Most of them in the field of organic food, dietary pattern, food culture as well as sensory evaluation (both in English as well as in Indonesian). I have been awarded research grant from several funding institution.

I am a member of the Indonesian Association of Food Technologist (IAFT) and active member of International Society of Organic Agriculture Research (ISOFAR) as well as member of Indonesia Society for Functional Food and Nutraceutical (ISFFN).

I am involved as technical committee for Indonesia Standard Body (BSN) for sensory evaluation standard as well as scientific advisor for Indonesia Organic Alliance (IOA). Since 2019, I am appointed by the IFOAM Asia as Organic innovation, Research and Development Committee board.

Since February 2020, I am member of Indonesian National Working group for food Safety and responsible for organic standard, organic agriculture policy, as well as auditing the implementation of organic standard and policy.

I have good contact and network with organic researcher in Malaysia, Thailand as well as in the Philippines.

My motivation for this candidacy is to encourage researcher in the region of Southeast Asia to become active member of ISOFAR as well as to promote the research in organic food quality and processing. Collaborative research in the region need a good academic atmosphere condition. Communication and sharing knowledge in my opinion is one effective key to develop academic network and for further step would benefit for collaborative work.
