## News from the year 2020

**December 16, 2020**

### **Journal of Organic Farming, Volume 10, issue 4 published**

We are pleased to deliver your requested table of contents alert for Organic Agriculture. Volume 10, Issue 4 is now available. ISOFAR membership gives free access to all articles in the journal, not just the ones below which are marked as open access. To take full advantage of this benefit, create an account on our new website (the address is [www.isofar.org](http://www.isofar.org) or [www.isofar.online](http://www.isofar.online)). In the member area, you will find a link that directs you to the journal.

The Organic Agriculture Journal is not only open for you to read but also to publish - provided your work passes the review process. We therefore encourage you to hand in your own scientific papers (<https://www.springer.com/journal/13165/submission-info>)

**November 12, 2020**

### **ISOFAR member Prof. Dr. Johannes Kahl, University of Kassel, died**

On 12 November 2020, ISOFAR member and our long-time colleague and friend, Professor Johannes Kahl, died at the age of 78 due to an illness. Since 2016, he was Professor at the Faculty of Organic Agriculture at the University of Kassel (Germany) and held the Chair of Organic Food Quality. Prof. Kahl's lectures on 'Organic food system and sustainable diets' were very popular among students. He has conducted many projects, e.g. Susplus project within Erasmus Plus 'Innovative Education towards Sustainable Food Systems', ProOrg project within ERANET Horizon 2020 'Code of Practice for organic food processing' and project from Ekhaga sc 'Promoting human health and well-being by maintaining matrix related organic food qualities from field to fork' and SysOrg project within ERANET Horizon 2020 'Organic agro-food systems as models for sustainable food systems in Europe and Northern Africa'. As member of ISOFAR and Chairman of the Food Quality and Health association (FQH), he worked intensively through organizing scientific workshops within the association, developing joint scientific publications.

Prof. Johannes Kahl was an outstanding scientist, an excellent teacher and a great friend.
